Thunder Blade

TM and © SEGA Enterprises, Inc.

Whirling copper blades and dropping quarters. Get used to those sounds because when you put THUNDER BLADE on your floor you'll hear a lot of both. THUNDER BLADE has it all: advanced high-resolution simulator graphics, stereo sound, and a motorless drive system that links the gunship controls and moving pilot seat with the screen action. The "cockpit" climbs or dives or rotates left or right with control stick movement. Other controls include a missile launch button, machine gun trigger, and throttle/hover control. Screen perspectives alternate between horizontal and vertical through a free 30-second training mission and four increasingly challenging gunship raids. Call your authorized SEGA distributor about putting THUNDER BLADE on your landing pad. Then listen to those sounds of profit.

*Both upright and
disease cabinets are
extremely compact
while offering big
features like a 20 inch
high-resolution
monitor.*
